McGregor's Year Book

Something for every Garden—Everything for some Gardens

This new Year Book, our silent salesman, comes to you offering at manufacturers' and growers' prices, the stock of one of the largest plant-producing establishments in the United States—offering something for every garden, everything for some gardens. Years of experience in packing plants has resulted in methods enabling us to guarantee their safe arrival, and in the years of our business career our products have found their way into every state and territory and into many foreign countries. For over 40 years we have pleased the flower lovers of America, and the business today is under the direct control of the founders and their sons. Our guarantee is an asset with us and a safeguard to you, giving absolute security to mail order buyers. We promise you as fine stock as can be grown, a large assortment and good service, and we believe therefore, that this catalogue, which we hope will be found pleasing and helpful, is entitled to the consideration of all buyers.

IMPORTANT INFORMATION FOR CORRESPONDENTS AND CUSTOMERS

Comparative Value of Plants

Don't think any plant too small to do well. The main part of a plant is its root system. The roots of comparatively small plants being carefully protected in pots permits shipping and planting anywhere at any time of the year that ground can be worked. Smaller pot plants are always easiest to handle. It is not always best that largest plants obtainable be planted. Often times smaller plants do better, because, with a pot grown root system, they establish themselves more easily. What has been said applies particularly to one-year pot grown roses. Pot grown roses are always the best in any size. If you wish the largest and best roses for quick effect, then select two-year size or three-year size which come from four five and six-inch pots. Nothing better is obtainable anywhere in the country.

Advantages of Pot Grown Plants

There are advantages in planting pot grown plants; namely, they can be planted any time of the year; the ball of earth contains all of the fine fibrous roots and when the plants are shipped, transplanting can be done with no more injury to the plant than if it had simply been removed to a larger sized pot. Growth continues just the same and the roots do not have to establish themselves as in the case of dormant plants. The pot grown plant, therefore, has many advantages.

Plant Something

"Plant something, do it as well as you can; but plant anyway, even if you cannot do it all as you would wish. With some effort, some success is certain. Make some effort anyway for the joy of having a more beautiful home in a beautiful America." (McGregor's Book—How to Grow All Kinds of Plants. Priced and described below.)

Separate Shipments

Separate shipments are sometimes made of orders when they can be handled better in this way. Seed orders are generally mailed separately from plant orders. Therefore please allow a reasonable time for items ordered to reach you.

Remittance With Order

Please send sufficient money to cover your entire order. The safest way is by Postoffice Money Order or Express Money Order. Postage stamps may be sent for small amounts provided two cents extra is sent with the remittance. Send perfect stamps only.

Errors and Complaints

We exercise the utmost care in filling orders, yet in a busy season errors or losses sometimes occur. Should you find it necessary to write about an order, be sure to give us date and copy of the original, amount of remittance, with full information to aid us in promptly taking care of the matter.

Parcel Post Shipments, with Soil on Roots

If inconvenient for any purchaser to receive an express shipment, then mailable plants may be sent by parcel post with soil on the roots, if customer so orders it, and adds double amount of postage for plants without soil, as explained in table (page 2).

Express Shipments

All large decorative plants, shrubs, heavy or bulky stock must be sent by Express. When large potted plants are sent by Express the soil is left about the roots.

Premiums

Our terms being cash with the order enables us to give additional plants, bulbs, and seeds on orders amounting to \$1.00 or more, as follows: On \$1.00 worth of goods bought at single Plant, Bulb or Packet prices, select plants, bulbs or seeds to the value of 20 cents extra. On a \$2.00 order select 40 cents extra. On a \$3.00 order select 60 cents extra. On a \$5.00 order select to the value of \$1.00 extra. On \$6.00 select \$1.20 extra, etc. Larger orders, premiums in proportion. We do not allow premiums on nursery stock, nor can we give same as premiums

Surprise Offer After-Season Sales

Propagating as we do six months in advance of the selling season, we must not be satisfied until we have taxed the limit of our capacity and made allowance for natural increase of business. As a result we generally have surplus of all kinds of plants and rather than carry this stock over, we hold a Clearance Sale beginning June 1, and make up Surprise Collections of miscellaneous plants at 98c per collection. In these 98c collections we give several dollars' worth of plants. Strictly our selection! Orders accepted any time during the spring for delivery June 1.

Winter Protection of Roses

We have indicated the blooming season and hardiness of roses, as follows: "Monthly Blooming" and "Summer Blooming Hardy with Protection," which refers to the Teas and Hybrid Teas, that should have protection through the winter. "Hardy Summer Blooming" and "Hardy June Blooming" refers to those which are hardy and do not require protection; the Hardy Climbers included. Bush Roses, however, whether Teas, Hybrid Teas, Hybrids or the Cluster flowering types are always helped with that winter protection that keeps the plants and the ground around the base of the plant dry. There is much more in common, or should be, between animal and plant life than is generally acknowledged by those who strive for success in growing roses. Both demand a sufficiency of nourishing food and drink, a pure atmosphere, careful protection and thorough cleanliness.

Guarantee

It will not be necessary to insure packages of plants against loss, as we guarantee all Shrubs, Plants, Bulbs, and Seeds that we send out to points within the United States to reach purchaser in good condition, when forwarded by mail or express. After goods are delivered to purchaser in growing condition our responsibility ends. A guarantee that fully protects you

Our Prices will compare favorably, we believe, with those of any responsible firm in the U. S., and are so low we must ask cash with order.

FREE OFFER

If you send us an order amounting to \$1.00 from a friend or neighbor who is not now a customer of ours, we will send you any one of the beautiful Roses shown in color on the face of cover of this book, free. If order from new customer amounts to \$2.50, we will send you any three of the Roses. If order amounts to \$5.00 we will send you the six Roses. (Roses 1-yr. size.)

McGregor's Book How to Grow Plants

Cultural directions for everything we sell. It is not enough that plants simply be allowed to grow. They should be encouraged to grow. Plants need care and respond readily to fitting treatment. All will grow but with intelligent care will mature with very different and attractive results. Give them every advantage through knowing them thoroughly and helping them to reach that maximum development which our book of instructions will help bring about. Approximately 300 subjects, 150 pages. Price, postpaid, 24 cents (12 two-cent stamps).

Springfield, Ohio, U. S. A. is headquarters in the United States for the growing and shipping of all kinds of plants and is the greatest Rose producing center in the world. (1)

McGregor's Fancy Exhibition Chrysanthemums

(Illustrated in color on back of cover.)—The chrysanthemums which we show on our color plate, are by far the most gorgeous and elegant of our fall blooming plants. For massive blooms, grandeur of color, ease of culture and certainty to flower, either in the open ground or in pots, there are no plants that will surpass them. The season of bloom lasts up until severe frosts. It is a pleasing thought to anyone who may have poor success with flowers to know the chrysanthemum will put forth some sort of a flower if the plant is only a few inches high. The collection we offer, if well-grown, will produce the largest and finest blooms which can be used for exhibition purposes. Varieties are: **SUNGLOW**, orange yellow; **GIGANTEA**, light pink; **OLD DOMINION**, brick red; **MAID OF HONOR**, deep pink; **BETSY ROSS**, pure white; **ARIZONA**, bronze; **KLONDIKE**, bright yellow; **PRINCETON**, dark red; **HALLOWE'EN**, bronze; **AMETHYST**, lavender; **CELEBRATION**, lemon-yellow and **PINK FEATHER**, pearl pink.

The plant may be grown as a pot plant, a bushy form or climbing. As a house plant it will thrive under practically all conditions. The Asparagus likes a good rich soil and fairly warm temperature. Requires plenty of light but should not be exposed to the direct rays of the sun. The long sprays of delicate leaves are frequently used for cut-flower work where a rich setting of green is desired.
